DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-10,21-30, drawn to a method/system of tracking earliest pilot phase offset for geo-location determination, classified in class 455, subclass 456.1.
- II. Claims 11-20,45-51, drawn to a mobile station/system used in a wireless communication system, classified in class 455, subclass 422.1.
- III. Claims 31-44, drawn to a method of improving geo-location measurements in a wireless system, classified in class 455, subclass 456.5.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I, II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions I, II and III have different modes of operation.
